# XELA IN SATELLITE COMMUNICATIONS

With years of proven success in safe, secure, and reliable systems, Xela® delivers software that solves critical business problems for satcom applications such as satellites, airplanes, homes and enterprises, and ground stations.

Satellites

Ground stations

Airplanes

Homes and enterprises

NETWORK INFRASTRUCTURE

Ground Stations

- Revenue growth through accelerated deployment of new services
- 99.9999% high availability, reducing SLA penalties
- Comprehensive security, minimizing risk

SYSTEM SIMULATION

Satellite Software Development

- Increased engineering efficiency with continuous integration and test
- Continuous access, debugging even hardware that is out of reach
- Comprehensive security, minimizing risk
